

LD/HD steel weighbridges

Low profile pit or surface mounted modular design

LD/HD is built with reliability for performance and reliability for harsh operating environments. Robust I beams design with dimensions from 6m x 3m to 21m x 3m in capacities of 30, 000 to 150, 000kg or custom length or capacity.

Key features include:

- Low profile deck – only 400 mm high
- Automatically welded – sandwich welded with heavy bottom plates
- Sand blasted and painted
- Durable paint finish that protects corrosion and contamination that can shorten the life of the steel modules
- Cables are routed through steel conduit to protect cable damages while cleaning debris and from rodents
- Guide rails as options
- Optional steel ramps
- Optional galvanized version
- Heavy duty I beam construction
- Easy to transport, install, dismantle and reinstall

ideal for sites with limited space
